

Injuries due to manual handwheel operations are a major concern in the chemical process industry. The torque required to operate these valves can vary due to the size and can often be strenuous but with the RAD valve turning tool we simplify this task.

The RAD 7GX Valve Turning Kit has a torque range of 100-700 ft.lbs. and takes all the strain off the operator.

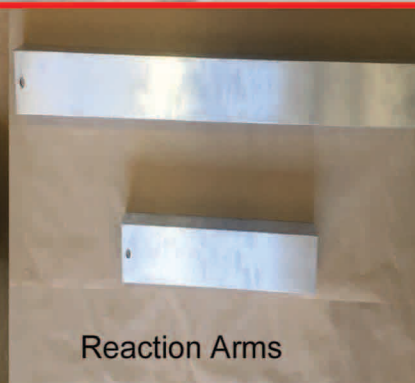

KIT INCLUDES:

Wheel Adaptor

Gearbox

Reaction Arms

RAD
Tool Kit
